

King Jethro Jerry

Software Engineer & UI/UX Designer • Remote

✉ jethrojerrybj@gmail.com • 🌐 [Portfolio](#) • 📁 [GitHub](#)

Software Engineer & UI/UX Designer with 4+ years architecting enterprise applications in JavaScript/TypeScript and PHP (Laravel) ecosystems, and designing end-to-end user experiences in Figma. Led development of applications serving 10,000+ users, achieving 98% code coverage and 95+ Lighthouse scores while reducing system latency by 40%. Designed complete system flows and high-fidelity interfaces for platforms including Campor and a 100-day UI challenge. Established CI/CD pipelines with comprehensive testing across 15+ production deployments.

PROFESSIONAL EXPERIENCE

Agentic AI Engineer @ 7 Corp May 2026 – June 2026 FREELANCE

- Developed AI agent workflows for Hermes, an AI-powered social media advertising assistant.
- Designed and implemented agentic workflows that automated the creation of marketing content for businesses.
- Built the advertising intelligence and workflow logic enabling Hermes to generate promotional content from user-provided business information and branded assets.
- Integrated third-party AI image and video generation services into the Hermes workflow.
- Enabled the AI agent to generate advertising copy, social media posts, and marketing creatives for platforms including Facebook and TikTok.
- Collaborated on a human-in-the-loop review process where AI-generated advertisements were approved and published as sponsored campaigns.

AI Prompt Engineer & Frontend Developer @ WITTY Technology Limited February 2026 – Present FULL-TIME

- Designed and authored prompts and system instructions powering Witty Tech's AI-powered WhatsApp assistant.
- Engineered conversational flows enabling the AI assistant to communicate effectively with importers and exporters on behalf of businesses.
- Developed prompt strategies to automate customer engagement, answer inquiries, and nurture leads until handoff to human representatives.
- Refined AI instruction sets to deliver accurate, context-aware, and business-oriented responses.
- Built and maintained frontend components for the Witty Tech platform, implementing responsive and user-friendly interfaces.
- Collaborated with the development team to integrate AI-powered features into the frontend application.

Lecturer (React.js & React Native) @ Lincoln College of Science Management and Technology November 2025 – June 2026 INTERNSHIP

- Taught React.js and React Native to students as part of the college's software engineering curriculum.

UI/UX Designer & Backend Developer @ Campor December 2025 CONTRACT

- Designed intuitive and responsive UI/UX interfaces for web applications.
- Developed backend services using Node.js and MongoDB.
- Designed and implemented RESTful APIs to support application functionality.
- Built and managed database schemas and data models in MongoDB.
- Collaborated on integrating frontend interfaces with backend services.

Full-Stack Developer @ Swift AI Recruit 2025 CONTRACT

- Solely built and supervised the full development of the Swift AI Recruit platform.
- Handled all layers of the stack: frontend, backend APIs, database design, and deployment.

Full-Stack Developer @ Aquilla Cyber 2024 – 2025 FREELANCE

- Built a full blog system for Aquilla Cyber and managed the creation and delivery of their internal learning management system.
- Handled both frontend and backend development across both products.

PHP Developer @ Lincoln College of Science Management and Technology 2024 – 2025 CONTRACT

- Developed the college's school management system using PHP.
- Led the scrum team, orchestrating agile sprints and coordinating cross-functional tasks.
- Engineered a responsive UI with TailwindCSS and Bootstrap; built dynamic features with JavaScript and PHP.

Creator & Lead Developer @ Ignite DSL 2024 SIDE PROJECT

- Architected a DSL for React Native using .ignite files and folder-based routing, resulting in a 67% increase in developer productivity.
- Developed a custom transpiler to convert DSL code into production-ready React Native applications.

Web Developer @ IceWebDezignz 2021 – 2023 FREELANCE

- Developed and customized WordPress applications tailored to client specifications, ensuring optimal performance across devices.
- Integrated essential plugins, maintained security, and collaborated with design/content teams for engaging user experiences.

TECHNICAL SKILLS

Core Engineering

TypeScript/JavaScript
MERN Stack (MongoDB, Express, React, Node.js)
System Design & Architecture
PHP/Laravel
Java
C++/C#

Frontend & Mobile

React/Next.js
React Native
Angular
Vue.js
Redux/Zustand
HTML5/CSS3
Bootstrap/Tailwind CSS
UI/UX Implementation (Figma, Adobe XD)

Backend & Data

REST/GraphQL APIs
Microservices Architecture
MySQL/PostgreSQL
MongoDB/Redis
WebSockets
XAMPP/LAMP Stack

DevOps & Quality

AWS/Cloud Services
Docker/Kubernetes
CI/CD Pipelines
Git/GitHub
Jest/Cypress

KEY PROJECTS

Campor (UI/UX Designer) — UI/UX Designer [Figma Link](#)

Tech: Figma

Designed the complete UI/UX for Campor, a school marketplace platform connecting vendors and buyers. Produced the entire system flow and interface design in Figma, covering all core user journeys from discovery to transaction.

100 Days Figma UI Challenge — Designer [Figma Link](#)

Tech: Figma

Completed a 100-day Dribbble-style UI design challenge on Figma (Days 1–42 shared), demonstrating consistent design output, visual exploration, and UI craft across diverse interface styles and use cases.

Swift AI Recruit — Lead Full-Stack Developer [Website](#)

Tech: Full-Stack

Built and supervised the full development of Swift AI Recruit as the sole full-stack developer. Responsible for architecture decisions, frontend implementation, backend APIs, and overall delivery of the platform.

Ignite DSL — Lead JavaScript/TypeScript Developer [Website](#)

Tech: TypeScript

Architected a domain-specific language (DSL) for React Native using .ignite files and folder-based routing (inspired by Next.js), resulting in a 67% increase in developer productivity through simplified code structure and automated navigation. Developed a custom transpiler to convert DSL code into production-ready React Native applications.

EDUCATION

Lincoln University College, Nigeria

Diploma in Computer Software Engineering

Software Architecture & Cloud Computing

2023 – 2025

CERTIFICATIONS

Professional Scrum Master I (PSM I)

2024 Completed

CMS Development with WordPress

2021 Completed

SEO Optimization Fundamentals

2021 Completed
